

4 REASONS TO STOP SPEEDING NOW

NO MATTER WHERE

It costs. A lot.

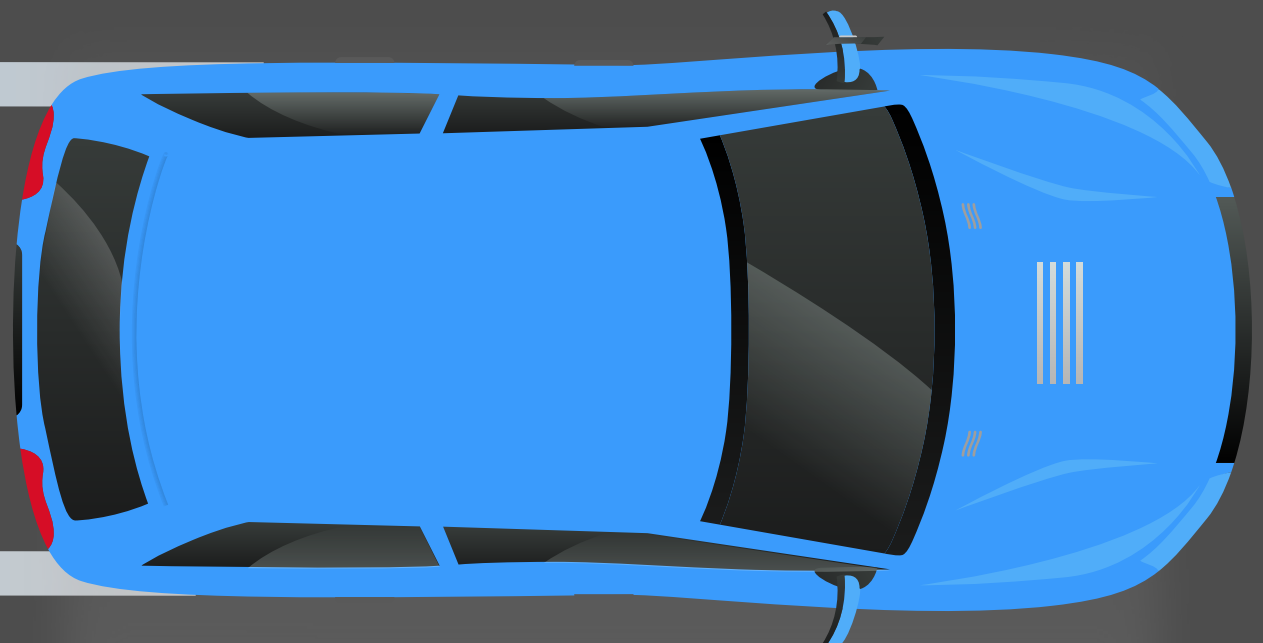

The minimum national speeding fine is £100 with 3 penalty points, but that's not the only reason to slow down! Speeding is also really dangerous to you and others.

IN THE COUNTRY

25% of all serious accidents happen on country roads

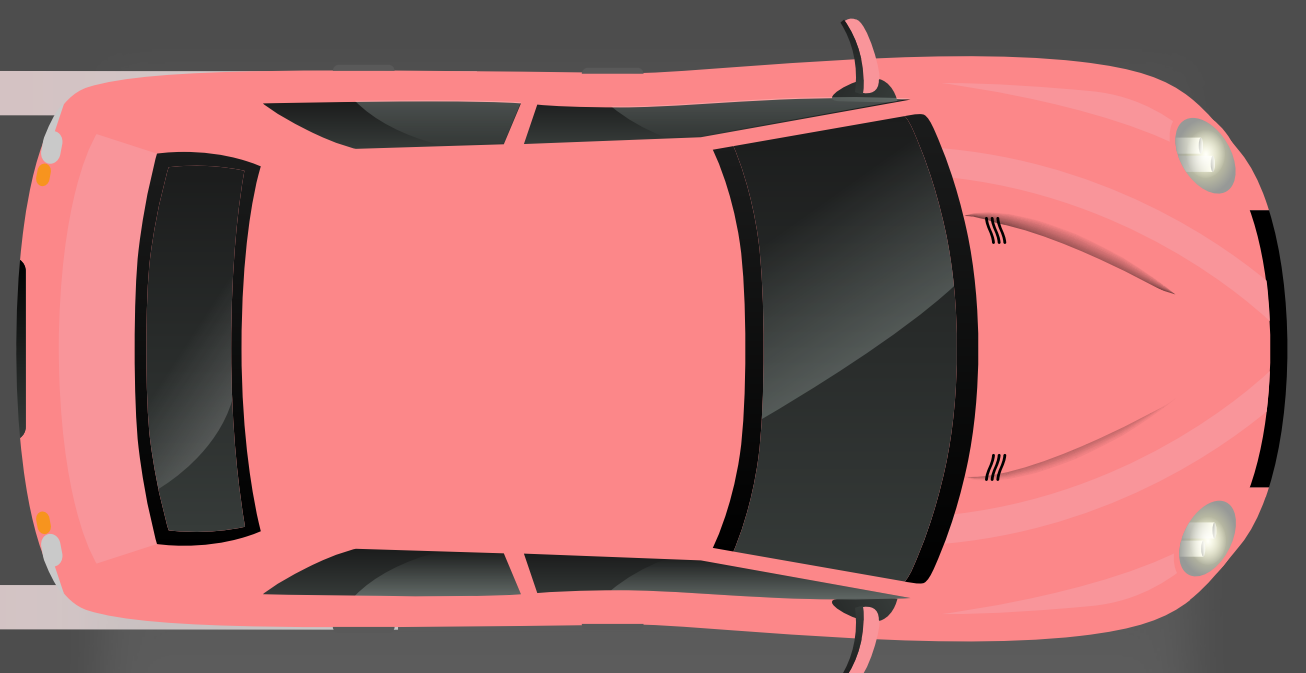

Young drivers are 30% more likely to crash if they drive more than 10mph over the speed limit on country roads.

ON THE MOTORWAY

You won't save that much time.

You'll only save about 7 minutes for every hour you drive at 10 miles over the speed limit. Worth the risk? We think not.

AT NIGHT

Visibility is reduced.

Speeding at night is 3 times more risky than speeding during the day, due to hazards like headlight beams and low visibility.
